

1. Step 1: Partition ~~of~~ input into categories.

→ To create a decision table, we will have to partition your input into categories.

Step 2: Construction of decision table.

Type of Customers Discount	New Customers, No coupons	New customers, with coupon	Existing customer and hold a loyalty card no coupon	Existing Customer and hold a loyalty Card with coupon	Existing customers without loyalty Card with a coupon
15%	*				
10%			*	*	
20%		*		*	*
No discount				●	

	Existing Customers without loyal card and no coupon.
15%	
10%	
20%	
No discount	*

Step 3: Pick user from input category and test them.

### 3. Test Cases Scenarios of Wireless Computer Mouse.

Ans:- 1. Check if the mouse is an optical mouse or not.

2. Verify whether left-click and Right-click buttons are working fine.

3. Check if the double click is working fine.

4. Verify the time duration between two <sup>left</sup> clicks, in order to consider it as a double click.

5. Check if the scroller is present at the top or not.

6. Verify the speed of mouse pointer.

7. Check the pressure required for clicking the mouse buttons.

8. Verification of acceleration of the mouse pointer.

9. Verify that clicking the button and dragging the mouse operation is working fine.

10. Check the dimension of the mouse, if it's suitable to grip and work.

11. Verify that the mouse works in all the allowed surfaces.

12. Check the range up to which the mouse remains operational as it is wireless.

13. Check the battery requirement of the mouse.

14. Check if there is an option to switch on or mouse.

- ②. In this argument the author reasons that the failure of Jenny's Beauty Parlour at the new place portends a ~~similar~~ fate with wrong decision. But Ronnie's Auto Repair Business is doing well at the former place of Jenny's Beauty parlour. The line of reasoning is that because the working is different. (Like Ronnie does Auto Repair and Jenny is running beauty parlour).

At Jenny's New Beauty Parlour place there would be ~~no~~ less people who frequently comes to beauty parlour like girl students etc. But, In the former place there would be many coming to that parlour the mistake is wrong decision made by Jenny. <sup>She</sup> Might have thought of huge business in the new place. Ronnie got a chance he took it and earning it.

My conclusion, would be the author should have given various reasons why jenny has moved to new place and what's going on her head at the time of decision making would help us give our opinion correctly.
